Bed Bug Treatment Preparation List:

1. Strip the bed(s) and launder all sheets, pillowcases, mattress pads, and blankets.
2. Clean + organize. It is time to throw away things you do not need/want.
3. Remove everything from bedroom closet(s) and place in plastic bags. Remove everything from dresser drawers, nightstands, and dressing tables and place in plastic bags.
4. Have all clothing and fabrics laundered or dry-cleaned.
5. Remove drapes + stuffed animals/toys and have them laundered, dry cleaned, or replaced.
6. Remove all pets. Air filters on fish tanks must be turned off. All cages are to be covered.
7. Discard cardboard boxes, shoeboxes, paper and plastic bags, old newspapers, stacks of magazines, and similar items in infested rooms.
8. Vacuum all infested rooms. Beside the floor, also vacuum mattresses, bedsprings, couches, chairs, closets and closet shelves, shoes, inside dresser draws, and beside table drawers. Vacuum bags are to be placed in a plastic bag and discarded.

Important Notes:

- Must vacuum all carpeted areas (including rugs) and clean all hardwood floors how you would normally clean them after treatment.
- A clutter free environment must be provided in order to allow access for the service technician to treat all the needed areas.
- Discarding any compromised (ripped/torn) materials or heavily infested items may be required.
- Staining may occur as a result of treatments contacting dry blood.
- Any laundered items must use a hot water + hot dryer cycle.
- Avoid moving items from heavily infested rooms/areas to other less-infested rooms.
- Before re-entry all bagged items must be inspected for pest activity by client.
- The client should not touch or move any monitoring/control device.
- Re-Entry within (4) hours into the treated areas is not permitted.
- Only pest control operators are permitted in the area during treatment.
